

# IMPEX COLOR s.r.l.

## PRODUCT DATA SHEET

### **SANI – DECOR VELATURA**

ACRYL-SILOXANE BASED SEMI-COVERING PAINT WITH FROSTING EFFECT.

#### DESCRIPTION

**Sani – Decor Velatura** is suitable for obtaining an aged, decorative frosting effect on surfaces previously coloured with SILCOTEX PAINT, which remains weatherproof and maintains its special property of permeability to water vapour.

#### CHARACTERISTICS AND TECHNICAL DATA

Drying time	: About 2 hours, second coat after minimum 4 hours .
Specific weight	: 1,400 gr./lt. at about 20°C
Viscosity	: Varies according to the period of storage.
Yield	: 8 – 12 mq./lt. varies according to the application cycle.
Application method	: With brush, tampon, cloth, sponge, etc.
Dilution	: 30% with cleanly water.
Colours	: From the chart and samples made from compatible pigments.
Application cycle	: Prepare the support as specified above. Apply two coats of SILCOTEX PAINT suitably diluted, preferably with a roller. Apply a coat of the product with brush or roller, spreading it uniformly and finishing immediately with the technique chosen (sponge, brush, cloth, pad etc.), taking particular care to obtain a uniform shading effect over the whole surface.
Conservation	: Protect from frost and excessive heat.
Storage	: More than 6 months.
Packing	: 12,5 lt and 5 lt
