

## PRODUCT DATA SHEET

### NATURAL - WAX

NEUTRAL WAX BASED PROTECTIVE WATER REPELLENT, FOR INTERIORS

**Protective covering expressly formulated for internal protection of: Lime based Smooth finishes and Marble effect finishes and Stucco.**

#### CHARACTERISTICS

Ready to use paste with special neutral waxes and organic polymers in an unscented solvent. The product is particularly indicated for protecting lime based Venetian brush finishes and shiny finishes for interiors from water, it increases the shine of treated surfaces, with the following advantages:

- Limited water absorption.
- Limited variation in the colour of the treated surface.
- Elevated non-stick properties for dust.
- Low stickiness of the polymerised protective covering.
- Highly stable to UV rays and acid or alkaline solutions.

#### APPLICATION

The product is applied as is on very dry and dusted surfaces.

The application may be effected by brush or rag being careful to distribute the product uniformly, polishing with a wool or lambskin rag as soon as it starts to dry.

Generally, one thick, evenly spread coat is enough to obtain excellent protection. The quantity of product necessary can vary from 50 to 100 gr./sq. m according to the absorption and number of coats applied.

#### THECNICAL DATA

Appearance : Dense white paste.

Specific weight : about 0,830 gr./lt.

Solvents : Mixture of aromatic and aliphatic hydrocarbons with very little odour.  
Insoluble in water - inflammable

Packaging : 1 litre and 5 litre.

Conservation : It is indispensable to keep the product in hermetically sealed containers at a temperature between + 5 °C and + 30 °C. The product is stable for at least 12 months.
